Trendy innovative water treatment with UV components

uv-technik Speziallampen GmbH presents, from 02.-05. November 2021, its comprehensive range of products and services for ballast-, drinking-, ultrapure- and wastewater at Aquatech in Amsterdam 2021.

During 4 days, more than 550 national and international exhibitors will show their latest innovations, services and technologies around the topic of drinking water, industrial wastewater and wastewater treatment at the Aquatech Messe Amsterdam. After merging with uv-technik meyer gmbh, uv-technik Speziallampen GmbH will present further innovations from its product range in the field of UV low-pressure and medium-pressure technology for process, drinking and waste water.

Press Release

Ilmenau, October 2021

Water treatment by means of UV technology is on the advance worldwide. The perfect interaction of the various UV components, such as for example, the reliable sensors with a globally unique longevity, the high-performance UV medium-pressure and low-pressure lamps and the robust electronic ballasts contribute to better water disinfection.

As a member of the internationally successful Hönle Group, uv-technik Speziallampen GmbH has been developing, manufacturing and selling high-tech UV lamps, electronic ballasts, UV sensors and other UV components for treating water, air and surfaces for 30 years. Its UV medium pressure components for water disinfection are used worldwide especially in sewage, swimming pool and ballast water systems and stand for the highest possible degree of reliability.

Find out more about the wide range of products from uv-technik Speziallampen GmbH. We would be happy to advise you and work with you to find the best solution for your application.

Visit us at Aquatech Amsterdam, booth 02.324.
